

Attention to function & form

Elegant profile

Optional Sun and Wind Sensor

Optional Remote control

Features Include

The HAROL PR Series are compact folding arm awnings with its own specific contemporary designs. Attention to technical details ensures years of trouble free operation.

The HAROL PR210 has an exposed fabric roller and is suitable for installation under an eave or similar where it is not necessary to give the fabric further protection.

The Arms: Extruded aluminium powder coated.

The Hinges: High pressure cast aluminium alloy. Hinge on durable slide bearings of toughened bronze with PTFE sliding layer. Thermally treated.

Springs and Steel cables: Zinc plated high quality spring steel. Grease impregnated Zinc plated steel cables ensure an even division of power.

The Shoulder: Extruded aluminium powder coated. Angle range from 10° to 45°. Design ensures against flapping and dropping of arms.

Sizes:
 Maximum- 6 metre in one part with two arms.
 - 7 metre in one part with three arms.
 - 12 metre in 2 parts with four arms.

Quality: 5 year guarantee. You can therefore expect that only the best materials were used and a high level of importance placed on providing the perfect finish.

Operation: The PR Series can be equipped with electrical operation, using a tubular motor. For the ultimate in comfort an automatic wind-sun sensor regulates the awning automatically, depending on the light intensity and the wind speed. Manual operation using a crank and gearbox is also available.

The folding arm awning type PR210 is suitable for fitting under a balcony eave or other projection, where it is not necessary to give the fabric further protection.

PR 210

Profile dimensions

The solid angle adjustment shoulders ensures the gradient of the awning is maintained over the extension.

The side covers are made of aluminium and the front rail is small and compact.
